Product Diagram

No.	Camera key	Operation
1	Power Key	Press and hold for 5 seconds to power on/off
2	Power Key	Quick press 1 second to wake up the camera from standby mode
3	Reset Hole	Press and hold for 5 seconds, it will reset and restart

Install CloudEdge APP

Search “CloudEdge” in App store or Google Play store, or scan below QR Code to download and install on smart phone.

For IOS

For Android

***Tips:** Please **ALLOW** below 2 permissions when use this App at first time .

1. Allow CloudEdge use mobile cellular data and wireless LAN (Function: If not allowed, it will be failed to add IP camera).
2. Allow CloudEdge to get system push message permissions (Function: When the camera triggers motion detection or audible alarm, the phone can receive alarm push).

Register Account

New users need to register by e-mail, click "Register", follow the steps to complete the registration of the account, and log in.

How to Add Camera to APP

1. Install Micro SD card

Please insert Micro SD card to record videos when motion detected and playback. (Micro SD card is not included, it supports 128GB Max.)

***Tips:** Please insert the MicroSD card **BEFORE** Power On, otherwise, the SD Card cannot be detected.

2. Power on Camera

Press the Power Button for 5 seconds to Turn on Camera (If cannot power on, please plug in DC 5V 1A/2A phone adapter to charge 15min first). **Power adapter is not included.**

**Indicator
Slowly
blinking
in red**

***Tips:** Ensure the indicator light slowly blinking in RED before setup Wi-Fi

3. Wi-Fi Setting

Put the camera and smart phone 1 to 3 feet (30 to 100 cm) away from the router to set W-iFi

***Tips: Please note camera only works under 2.4G Wi-Fi, not supports 5G Wi-Fi.**

4. APP Setting

4.1 Open CloudEdge App, Click  and select “Battery Camera”.

4.2 Select “The device has flashed red” and tap “Next” for below 3 Steps.

4.3 Select 2.4Ghz Wi-Fi SSID and input password, tap NEXT

4.4 Put the QR code in front of the camera lens about 15cm.

The device lens is aimed at the QR code on the phone screen with a distance of 15 cm. After the device recognizes the QR code, it will sound "Boogu", after heard it, then tap "Hear Tone".

Distance in 15cm (4.9 inches)

4.5 After click "Hear tone", camera will start connecting WI-FI and skip to "Search to Device" page, after setup finished, you can edit camera name here, then click "DONE" to open camera in My Device list, now you can watch real-time video.

Device Menu

P2P Sharing-Person to Person

Step 1--Add your Friend's account in app

***Tips: Ensure Friend's account already registered in CloudEdge app**

Step 2--Friend Agree to add request

Step 3--Share video to your Friend's account

Body Detection Setting

PIR “Body Detection” default setting is “Mid”, the detecting distance is 6 meters (20ft), it is adjustable in “My Device” -> “Device Settings” -> "Body Detection".

Sensitivity	Detecting Distance (For moving and living things)
Low	Up to 4 meters (13ft)
Medium	Up to 6 meters (20ft)
High	Up to 8 meters (26ft)

Alarm Notification and Playback

Battery camera with PIR sensor is not designed for 7X24 all day recording, but just push alarm message notification to phone APP and record video to Micro SD Card when PIR sensor detected human body motion events, then you can playback the motion videos wherever you are via CloudEdge App.

When PIR is triggered, camera and system actions:

1. Alarm Sound in app (Please enable Cloudedge APP notification in mobile setting and also mobile volume is on)
2. Alarm Message Notification (Please enable Cloudedge APP notification in mobile setting)
3. Alarm snapshot and video record on Micro SD Card (Please insert Micro SD Card)

Camera Installation

You can put it on any flat place: Table, Chair, Floor, etc.

How to Install with Wall Mount:

Fix the iron ball bracket to the wall with screws or double-sided adhesive, and then magnetize the camera to the iron ball. Installation is very convenient and also easy to adjust the angle.

***Tips:** Please make sure your wall surface is flat and no dust, please clean it before you stick the wall mount. If the wall surface is not smooth, we suggest you use the wall mount with screws instead of the magnetic mount.

Important Notes for Reducing False

To reduce false alarms, please note that:

- Do not install the camera facing any objects with bright lights, including sunshine, bright lamplights, etc.
- Do not place the camera too close to a place where there frequently moving vehicles. Based on numerous tests, the recommended distance between the camera and vehicle is 15 meters (55ft).
- Stay away from the outlets, including air conditioner vents, humidifier outlets, the heat transfer vents of the projectors, etc.
- Do not install the camera facing the mirror.
- Keep the camera at least 1 meter away from any wireless devices, including Wi-Fi routers and phones, in order to avoid wireless interference.

Cover the Monitoring Area

When installing the camera, it's not suggested to make the PIR sensor vertically face the moving object, otherwise it may not detect the motion events. It is suggested to make the angular between PIR sensor and detected object larger than 10 degree.

Appendix

LED Status Description and Troubleshooting Sheet

No.	LED Status	Camera Status
1	Slow blinking Red	Awaiting WiFi Connection
